

EXECUTION

The Ultimate Success Program has a unique implementation process that functions as the “bullet” that penetrates the core issues and leads to success. It begins with attacking barriers to alignment, as illustrated by the graphic below.

Facilitators from each team involved will be trained to be able to lead groups through guided discussion about the topic covered.

All participants are engaged in 12 or 24 facilitated sessions, depending on the process path chosen. Each of these sessions is led by a Master Facilitator through an Internet program that allows different physical locations to participate together.

Teams will determine their course and develop an action plan that is reviewed at the next meeting.

As appropriate, a Steering Team will keep track of the participation of all individuals and the progress on achieving goals.

Once a Month, the Organizational Project Owner will be briefed on the progress being made.

“The biggest gap in your life is that between **what you know ...**

...and what you do.”

- Bob Proctor
